Novelty, inventive step, and industrial applicability (Item V)

Claim 1

1. From DE10017438 (D1) (see figure 1) there is a dispenser for dispensing a metered volume of a fluid product known having:

- (a) a storage chamber (2) for storing the fluid product in;
- (b) an outlet orifice (13) through which the fluid product is dispensable from the dispenser; and
- (c) a dispensing mechanism (3, 31) adapted in use to dispense a metered volume of the fluid product from the storage chamber (2) through the outlet orifice;

wherein the dispensing mechanism has:

- (i) a metering chamber (7) which is adapted in use to provide the metered volume of the fluid product for discharge through the outlet orifice (13), the metering chamber (7) being movable between:

a first volumetric state, in which the metering chamber (7) has a first volume greater than the metered volume and is in fluid communication with the storage chamber (2) such that, in use, an excess volume of the fluid product consisting of the metered volume and a surplus volume is transferable to the metering chamber (7) from the storage chamber (2), and

a second volumetric state, in which the metering chamber (7) has a second volume less than the first volume and no less than the metered volume and is isolated from the storage chamber (2) such that, in use, the metered volume of the fluid product is contained in the metering chamber (7) ready for dispensing through the outlet orifice; and

- (ii) a bleed arrangement (22) adapted in use to bleed the surplus volume of the fluid product from the metering chamber (7) as it moves from the first volumetric state to the second volumetric state.

2. Furthermore the features of claims 2-40 and 44 are known from DE10017438 (D1).

Claims 41-43

4. The features from claims 41-43, however, do not seem to constitute a difference which could lead to subject-matter involving an inventive step according to Article 33(3) PCT.

Certain defects in the international application

5. Independent claim 1 is not drafted in the two part form specified in Rule 6.3b) of the PCT.
6. Reference numerals are missing after the technical features of the claims (see Rule 6.2b) and PCT Preliminary Examination Guidelines, Chapter III, 4.11).
7. The description does not cite a document reflecting the closest background art (see Rule 5.1a) ii) PCT).
